DETAILED ACTION

Allowable Subject Matter

1. Claim 1-3, 5-10 and 12-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method of communication using working paths and protection paths.

The closest prior art, Ikeda et al. (US 6,643,041) teaches a method of communication using working paths 8 and protection paths 7 (Figure 1). Ikeda, however, fails to teach converting one of the protection paths into a working path temporarily in order to increase a bandwidth of the working paths when a bandwidth increase request occurs in the path network; and adding protection paths in order to increase a bandwidth of the protection paths; and re-arranging the working paths and the protection paths such that all the working paths connect the transmitting node and the receiving node via a first route and all the protection paths connect the transmitting node and the receiving node via a second route. These features are claimed in independent claims 1, 8, 15 and 18 and render them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled
“Comments on Statement of Reasons for Allowance.”
